Statement of management responsibilities

Management has prepared and is responsible for the fair presentation of financial statements and related notes of MCB Non-banking Credit Organization Closed Joint Stock Company (the "Company"). These have been prepared in accordance with International Financial Reporting Standards (IFRS) and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error and also necessarily include amounts based on judgements and estimates made by management.

The Company maintains internal accounting control systems and related policies and procedures designed to provide reasonable assurance that assets are safeguarded, that transactions are executed in accordance with management's authorization and properly recorded, and that accounting records may be relied upon for the preparation of financial statements and other financial information. The system contains self-monitoring mechanisms that allow management to be reasonably confident that controls, as well as the Company's administrative procedures and internal reporting requirements, operate effectively. There are inherent limitations in the effectiveness of any system of internal control, including the possibility of human error or the circumvention or overriding of controls. Accordingly, even an effective internal control system can provide only reasonable assurance with respect to financial statement preparation.

Independent auditor's report

To the Shareholders of MCB Non-banking Credit Organization Closed Joint Stock Company

Report on the audit of the financial statements

Opinion

We have audited the financial statements of **MCB Non-banking Credit Organization Closed Joint Stock Company** (the "Company"), which comprise the statement of financial position as at December 31, 2022, and the statement of comprehensive income, the statement of changes in equity and the statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at December 31, 2022, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with International Ethics Standards Board for Accountants Code of Ethics for Professional Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

MCB Non-banking Credit Organization Closed Joint Stock Company

Financial Statements

Notes to the financial statements

For the year ended December 31, 2022

1 Legal status and nature of operations

MCB Non-banking Credit Organization Closed Joint Stock Company (the “Company”) was incorporated on October 16, 2009 in the Republic of Azerbaijan. The Company is a closed joint stock company limited by shares and was set up in accordance with Azerbaijani regulations. The Company was initially registered under the registration number 1701045991, dated October 15, 2009 at the Ministry of Taxes of the Republic of Azerbaijan. Due to the change in the share capital the Company was re-registered on March 28, 2014 with the Ministry of Taxation of the Republic of Azerbaijan. The Company’s registered address is 49 B Tbilisi Avenue Baku AZ1065, Republic of Azerbaijan.

The Company’s principal business activity is provision of finance leases within the Republic of Azerbaijan. The Company leases out various types of automotive vehicles, industrial equipment, equipment used in medicine, health care, and for other business needs. In addition, the Company leases out cars and trucks. Further the Company is involved in real estate finance leases. During the prior year on November 12, 2021, the Central Bank of the Republic of Azerbaijan (CBAR) has issued non-banking credit organization (NBCO) license (BKT-42) to the Company. The Company is a subsidiary of MCB Bank Limited, which is also the Ultimate Parent Company (the “Parent Company”), a public limited company listed on Pakistan Stock Exchange in Pakistan.

2 Statement of compliance with IFRS

These financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

3 Standards, interpretations and amendments to existing standards

3.1 Standards, interpretations and amendments to existing standards that are effective in 2022

In the current year the Company has applied the amendments to IFRS 3, IAS 16, IAS 37 and annual improvements to IFRS Standards 2018–2020 issued by the International Accounting Standards Board (“IASB”) that are mandatorily effective for an accounting period that begins on or after January 1, 2022. The application of these amendments to IFRSs has not had any material impact on the amounts reported for the current and prior periods but may affect the accounting for the Company’s future transactions or arrangements. Other than the above, there are no other significant IFRSs, amendments or interpretations that were effective for the first time for the financial year beginning on or after January 1, 2022.

3.2 Standards, interpretations and amendments to existing standards that are not yet effective and have not been adopted early by the Company

At the date of authorisation of these financial statements, the following new standards, interpretations and amendments to existing standards have been published but are not yet effective and have not been adopted early by the Company. Information on the relevant new standards, amendments and interpretations that are not yet effective are given below:

New and revised IFRS	Effective for annual period beginning on or after
Amendments to IAS 1 ‘Presentation of Financial Statements’ to address the classification of liabilities as current or non-current providing a more general approach based on the contractual arrangements in place at the reporting date.	1 January 2023
IFRS 17 ‘Insurance Contracts’ which requires insurance liabilities to be measured at a current fulfilment value and provides a more uniform measurement and presentation approach for all insurance contracts.	1 January 2023

MCB Non-banking Credit Organization Closed Joint Stock Company

Financial Statements

Notes to the financial statements (continued)

For the year ended December 31, 2022

3 Standards, interpretations and amendments to existing standards (continued)

3.2 Standards, interpretations and amendments to existing standards that are not yet effective and have not been adopted early by the Company (continued)

New and revised IFRS	Effective for annual period beginning on or after
Amendments to IFRS 17 'Insurance Contracts' to address concerns and implementation challenges identified after IFRS 17 was published in 2017.	1 January 2023
Extension of the Temporary Exemption from Applying IFRS 9 (Amendments to IFRS 4). The amendment changes the fixed expiry date for the temporary exemption in IFRS 4 'Insurance Contracts' from applying IFRS 9 'Financial Instruments', so that entities would be required to apply IFRS 9 for annual periods beginning on or after 1 January 2023.	1 January 2023
Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2) which require that an entity discloses its material accounting policies, instead of its significant accounting policies.	1 January 2023
The IASB issued 'Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments to IAS 12)' that clarify how companies account for deferred tax on transactions such as leases and decommissioning obligations.	1 January 2023
The amendments replace the definition of Accounting Estimates (Amendments to IAS 8) - The amendments replace the definition of a change in accounting estimates with a definition of accounting estimates. Under the new definition, accounting estimates are "monetary amounts in financial statements that are subject to measurement uncertainty".	1 January 2023

Management anticipates that all the relevant pronouncements will be adopted in the Company's accounting policies for the first period beginning after the effective date of the pronouncement. The Company's management has yet to assess the impact of these changes on the Company's financial statements.

4 Summary of significant accounting policies

4.1 Overall considerations

These financial statements have been prepared using the measurement bases specified by IFRS for each type of asset, liability, income and expense. The measurement bases are more fully described in the accounting policies below. Further the accounting policies applied in the preparation of the financial statements are consistent with those applied in the annual financial statements for the year ended December 31, 2021.

4.2 Foreign currency translation

Functional and presentation currency

These financial statements are presented in Azerbaijan Manat (AZN), which is also the functional currency of the Company.

Foreign currency transactions and balances

Foreign currency transactions are translated into the functional currency, using the exchange rates prevailing at the dates of the transactions (spot exchange rate). Foreign exchange gains and losses resulting from the settlement of such transactions and from the remeasurement of monetary items at year-end exchange rates are recognised in profit or loss.

Non-monetary items are not retranslated at year-end and are measured at historical cost (translated using the exchange rates at the transaction date), except for non-monetary items measured at fair value which are translated using the exchange rates at the date when fair value was determined.

MCB Non-banking Credit Organization Closed Joint Stock Company

Financial Statements

Notes to the financial statements (continued)

For the year ended December 31, 2022

4 Summary of significant accounting policies (continued)

4.3 Property, equipment and right-of-use assets

Property and equipment are initially recognised at acquisition cost or construction cost, including any costs directly attributable to bringing the assets to the location and condition necessary for it to be capable of operating in the manner intended by the Company's management. These assets are subsequently measured using the cost model, cost less subsequent depreciation and impairment losses (if any). Depreciation on all operating fixed assets is charged using the diminishing balance method except for vehicles, computer and office equipment and right-of-use asset, which are depreciated using the straight-line method in accordance with the rates below and after taking into account residual value, if any.

The residual values, useful lives and depreciation methods are reviewed and adjusted, if appropriate, at each reporting date.

Depreciation of property and equipment is calculated at the estimated following rates:

• Furniture and fixtures	10%
• Computer and office equipment	20%
• Vehicles	20%
• Other fixed assets	20%
• Right-of-use asset	Over the period of lease liability

Depreciation on additions is charged from the month the assets are available for use while no depreciation is charged in the month in which the assets are disposed off.

Gains or losses arising on the disposal of property and equipment are determined as the difference between the disposal proceeds and the carrying amount of the assets and are recognised in profit or loss within 'other income - net'.

4.4 Intangible assets

Intangible assets with finite useful lives are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line method over their estimated useful life of 3 years. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

4.5 Impairment testing of non-financial assets

For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are largely independent cash inflows (cash-generating units). As a result, some assets are tested individually for impairment and some are tested at cash-generating unit level.

All individual assets or cash-generating units are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

MCB Non-banking Credit Organization Closed Joint Stock Company

Financial Statements

Notes to the financial statements (continued)

For the year ended December 31, 2022

4 Summary of significant accounting policies (continued)

4.5 Impairment testing of non-financial assets (continued)

An impairment loss is recognised for the amount by which the asset's or cash-generating unit's carrying amount exceeds its recoverable amount, which is the higher of fair value less costs to sell and value-in-use. To determine the value-in-use, management estimates expected future cash flows from each cash-generating unit and determines a suitable interest rate in order to calculate the present value of those cash flows. The data used for impairment testing procedures are directly linked to the Company's latest approved budget, adjusted as necessary to exclude the effects of future reorganisations and asset enhancements. Discount factors are determined individually for each cash-generating unit and reflect their respective risk profiles, such as market and asset-specific risks factors. All assets are subsequently reassessed for indications that an impairment loss previously recognised may no longer exist. An impairment charge is reversed if the cash-generating unit's recoverable amount exceeds its carrying amount.

4.6 Leases as lessor

Recognition and measurement of lease

Leases are accounted for in accordance with IFRS 16. When assets are leased out under finance lease, the present value of the minimum lease payments is recognised as a receivable. Leases are transferred as finance lease when risk and benefit of ownership are significantly transferred by the lease term to lessee. Other types of leases are classified as operating leases. As per lease, the lessor transfers, in return of payments, the usufruct of an asset to the lessee for a defined period of time that ends with the ownership transferred to lessee.

Investment in finance leases is shown at the net present value of finance lease payments less the provision for doubtful receivables (if any). All direct costs of finance lease are shown under the net present value of investment in finance leases.

Finance lease payments are divided between interest income and the principal payment so that the finance lease income is allocated over the period of the contract.

Inception of the lease

The inception of the lease is considered to be the date of the lease agreement, or the date of commitment, if earlier. For purposes of this definition, a commitment shall be in writing, signed by the parties involved in the transaction, and shall specifically set forth the principal terms of the transaction.

Commencement of the lease term

The commencement of the lease term is the date from which the lessee is entitled to exercise its right to use the leased asset. It is the date of initial recognition of the lease.

4.7 Loan to a related party

Loan to a related party is initially recognized at a fair value. Subsequently, this is measured at amortized cost using the effective interest method and are carried net of any allowance for impairment losses. The part of loan to be received within twelve months after balance sheet is classified as current asset and the part of loan to be receive after twelve months of balance sheet date is classified as non-current asset.

MCB Non-banking Credit Organization Closed Joint Stock Company

Financial Statements

Notes to the financial statements (continued)

For the year ended December 31, 2022

4 Summary of significant accounting policies (continued)

4.8 Financial instruments

Recognition, initial measurement and de-recognition

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the financial instrument and are measured initially at fair value plus transactions costs.

Financial assets are derecognised when the contractual rights to the cash flows from the financial asset expire, or when the financial asset and all substantial risks and rewards are transferred.

A financial liability is derecognised when it is extinguished, discharged, cancelled or expired. Financial assets and financial liabilities are measured subsequently as described below.

Classification and measurement

Financial assets

On initial recognition, a financial asset is classified as measured: at amortised cost, Fair Value through Other Comprehensive Income (FVOCI) or Fair Value through Profit and Loss (FVTPL).

A financial asset is measured at amortised cost if it meets both the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and profit on the principal amount outstanding.

A debt instrument is measured at FVOCI only if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and profit on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in fair value in OCI. This election is made on an investment-by-investment basis.

All other financial assets are classified as measured at FVTPL.

In addition, on initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Business model assessment:

The Company makes an assessment of the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is being managed and information is provided to management.

MCB Non-banking Credit Organization Closed Joint Stock Company

Financial Statements

Notes to the financial statements (continued)

For the year ended December 31, 2022

4 Summary of significant accounting policies (continued)

4.8 Financial instruments (continued)

Classification and measurement (continued)

Financial assets (continued)

Assessment whether contractual cash flows are solely payments of principal and profit

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Profit' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic financing risks and costs (e.g. liquidity risk and administrative costs), as well as profit margin.

In assessing whether the contractual cash flows are solely payments of principal and profit, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition.

Reclassifications:

Financial assets are not reclassified subsequent to their initial recognition, except in the period after the Company changes its business model for managing financial assets.

Derecognition:

Any cumulative gain/loss recognised in OCI in respect of equity investment securities designated as FVOCI is not recognised in profit or loss account on derecognition of such securities.

Impairment

The Company recognises allowance for impairment for expected credit losses (ECL) on financial assets including at amortised cost.

The Company measures allowance for impairment at an amount equal to lifetime ECL, except for those financial instruments on which credit risk has not increased significantly since their initial recognition, in which case 12-month ECL is measured.

12-month ECL are the portion of ECL that result from default events on a financial instrument that are possible within 12 months after the reporting date.

Measurement of ECL:

ECL are probability-weighted estimate of credit losses. They are measured as follows:

- financial assets that are not credit-impaired at the reporting date: as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive).
- financial assets that are credit-impaired at the reporting date: as the difference between the gross carrying amount and the present value of estimated future cash flows;

Credit-impaired financial assets:

At each reporting date, the Company assesses whether financial assets carried at amortised cost and debt financial assets carried at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Financial Statements

Notes to the financial statements (continued)

For the year ended December 31, 2022

4 Summary of significant accounting policies (continued)

4.8 Financial instruments (continued)

Write-off:

Assets carried at amortised cost and debt securities at FVOCI are written off (either partially or in full) when there is no realistic prospect of recovery. This is generally the case when the Company has exhausted all legal and remedial efforts to recover from the customers. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

Classification and subsequent measurement of financial liabilities

Financial liabilities comprise borrowings, lease liability, accrued interest and accrued liabilities.

Financial liabilities are measured subsequently at amortised cost using the effective interest method.

All interest-related charges are included within 'interest expenses'.

Offsetting financial instruments

Financial assets and liabilities are offset and the net amount is reported in the statement of financial position only when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously.

4.9 Cash and cash equivalents

Cash and cash equivalents are items, which are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Cash and cash equivalents in the statement of financial position comprise cash on hand (if any) and cash in banks and are carried at amortised cost using the effective interest method. Further the Company has applied IFRS 9 ECL model to calculate the impairment of cash in banks. For purpose of the statement of cash flows, cash on hand and cash at banks are considered as cash and cash equivalents.

4.10 Equity, reserves and dividend payments

Share capital represents the nominal value of shares that have been issued.

Retained earnings include all current and prior years' profits and losses.

4.11 Employee benefits

Staff costs and related contributions

Wages, salaries, contributions to the state pension and social insurance funds in Azerbaijan Republic, paid annual leave and sick leave, bonuses, and non-monetary benefits are accrued in the year in which the associated services are rendered by the employees of the Company.

End of service benefits

As required by Azerbaijan legislation, the Company withholds amounts of pension contributions from the salaries of employees and pays them to the state pension fund along with its own share of contribution. Upon retirement all retirement benefit payments are made by the state pension fund.

4 Summary of significant accounting policies (continued)

4.12 Provisions and contingencies

Provisions are recognised when present obligations because of a past event will probably lead to an outflow of economic resources from the Company and amounts can be estimated reliably. Timing or amount of the outflow may still be uncertain. A present obligation arises from the presence of a legal or constructive commitment that has resulted from past events, for example, legal disputes or onerous contracts.

Provisions are measured at the estimated expenditure required to settle the present obligation, based on the most reliable evidence available at the reporting date, including the risks and uncertainties associated with the present obligation. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. Provisions are discounted to their present values, where the time value of money is material.

Any reimbursement that the Company can be virtually certain to collect from a third party with respect to the obligation is recognised as a separate asset. However, this asset may not exceed the amount of the related provision.

All provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. In those cases where the possible outflow of economic resources as a result of present obligations is considered improbable or remote, no liability is recognised, unless it was assumed in the course of a business combination.

Contingent liabilities are not recognised in the financial statements unless it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate can be made. A contingent asset is not recognised in the financial statements but disclosed when an inflow of economic benefits is probable.

4.13 Revenue recognition

Revenue is recognised when the amount of revenue can be measured reliably, collection is probable, the costs incurred or to be incurred can be measured reliably, and when the criteria for the Company's activities have been met. These activity-specific recognition criteria are described below:

Lease rental income

Financing method is used in accounting for income from lease financing. Under this method, the unearned lease income (excess of the sum of total lease rentals and estimated residual value over the cost of leased assets) is deferred and taken to income over the term of the lease period so as to produce a constant periodic rate of return on the outstanding net investment in lease.

Gains / losses on termination of lease contracts are recognized as income when these are realized.

4.14 Borrowing cost

Borrowing costs that are not directly attributable to the acquisition, construction or production of a qualifying asset are recognised in statement of comprehensive income using the effective interest method. and reported in 'interest expense'. Foreign currency gains and losses are reported on a net basis depending on whether foreign currency movements are in a net gain or net loss position.

4.15 Operating expenses

Operating expenses are recognised in profit or loss upon utilisation of the service or at the date of their origin.

Notes to the financial statements (continued)

For the year ended December 31, 2022

4 Summary of significant accounting policies (continued)

4.16 Taxation

Income tax expense represents current and deferred tax expense/income.

Current taxation

The current tax expense is based on taxable profit for the year. Taxable profit differs from net profit as reported in the statement of comprehensive income because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Company's current tax expense is calculated using tax rates that have been enacted or substantively enacted in the Azerbaijan Republic during the reporting period.

Deferred taxation

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit and is accounted for using the balance sheet method. Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets are recognized to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilized. Such assets and liabilities are not recognized if the temporary difference arises from the initial recognition of other assets and liabilities in a transaction that affects neither the tax profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realized. Deferred tax is charged or credited in the statement of comprehensive income, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred income tax assets and deferred income tax liabilities are offset and reported net on the statement of financial position if:

- The Company has a legally enforceable right to set off current income tax assets against current income tax liabilities; and
- Deferred tax assets and the deferred income tax liabilities relate to income taxes levied by the same taxation authority on the same taxable entity.

The Azerbaijan Republic also has various other taxes, which are assessed on the Company's activities. These taxes are included as a component of operating expenses in the statement of comprehensive income.

4.17 Significant management judgement in applying accounting policies

The preparation of financial statements requires management to make judgement, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expense. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognized prospectively.

Provisions against lease receivables

Inputs, assumptions and techniques used for ECL calculation – IFRS - 9 Methodology

Key concepts in IFRS 9 that have the most significant impact and require a high level of judgment, as considered by the Company while determining the impact assessment, are:

4 Summary of significant accounting policies (continued)

4.17 Significant management judgement in applying accounting policies (continued)

Provision against lease receivables (continued)

Assessment of Significant Increase in Credit Risk:

The assessment of a significant increase in credit risk is done on a relative basis. To assess whether the credit risk on a financial asset has increased significantly since origination, the Company compares the risk of default occurring over the expected life of the financial asset at the reporting date to the corresponding risk of default at origination, using key risk indicators that are used in the Company's existing risk management processes.

The assessment of significant increases in credit risk will be performed at least quarterly for each individual exposure based on below mentioned factors. If any of the following factors indicates that a significant increase in credit risk has occurred, the instrument will be moved from Stage 1 to Stage 2:

1. We have established thresholds for significant increases in credit risk relative to initial recognition.
2. Additional qualitative reviews are performed to assess the staging results and make adjustments, as necessary, to better reflect the positions which have significantly increased in risk.

Movements between Stage 2 and Stage 3 are based on whether financial assets are credit impaired as at the reporting date. The determination of credit-impairment under IFRS 9 is similar to the individual assessment of financial assets for objective evidence of impairment under IAS 39.

Macroeconomic Factors, Forward Looking Information (FLI) and Multiple Scenarios:

The measurement of expected credit losses for each stage and the assessment of significant increases in credit risk must consider information about past events and current conditions as well as reasonable and supportable forecasts of future events and economic conditions. The estimation and application of forward-looking information require significant judgment.

PD, Loss Given Default (LGD) and Exposure At Default (EAD) inputs used to estimate Stage 1 and Stage 2 credit loss allowances are modelled based on the historical trends and macroeconomic variables (or changes in macroeconomic variables) that are most closely correlated with credit losses in the relevant portfolio. Management overlay is also used to align the macroeconomics factors with the current condition of portfolio based on best management estimate and information.

The estimation of expected credit losses in Stage1 and Stage 2 is a discounted probability weighted estimate that considers a minimum of three future macroeconomic scenarios.

Definition of default:

The definition of default used in the measurement of expected credit losses and the assessment to determine movement between stages is consistent with the definition of default used for internal credit risk management purposes. IFRS 9 contains a rebuttable presumption that default has occurred when an exposure is greater than 90 days past due. Management has also adopted the IFRS 9 assumption and has considered 90 days past due receivables as an indicator of default.

Governance:

In addition to the existing risk management framework, the Company has established an internal Committee to provide oversight to the IFRS 9 impairment process. The Committee is comprised of senior representatives from Finance, Risk Management and Economics and is responsible for reviewing and approving key inputs and assumptions used in our expected credit loss estimates. It also assesses the appropriateness of the overall allowance results to be included in the financial statements

Financial Statements

Notes to the financial statements (continued)

For the year ended December 31, 2022

4 Summary of significant accounting policies (continued)

4.17 Significant management judgement in applying accounting policies (continued)

Leases

In applying the classification of leases in IFRS 16, as a lessor, the management considers its leases as finance lease arrangements and as a lessee, the management considers its leases as operating lease. In some cases, the lease transaction is not always conclusive, and management uses judgment in determining whether the lease in an operating lease arrangement.

Recognition of deferred tax assets

The extent to which deferred tax liability can be recognised is based on an assessment of the probability of the Company's future taxable expenses against which the deductible temporary differences can be utilised. In addition, significant judgement is required in assessing the impact of any legal or economic limits or uncertainties (see note 4.16).

4.18 Estimation uncertainty

Information about estimates and assumptions that have the most significant effect on recognition and measurement of assets, liabilities, income and expenses is provided below. Actual results may substantially differ.

Impairment of non-financial assets

An impairment loss is recognised for the amount by which the asset's or cash-generating unit's carrying amount exceeds its recoverable amount. To determine the recoverable amount, management estimates expected future cash flows from each cash-generating unit and determines a suitable interest rate in order to calculate the present value of those cash flows. In the process of measuring expected future cash flows management makes assumptions about future operating results. These assumptions relate to future events and circumstances. The actual results may vary and may cause significant adjustments to the Company's assets within the next financial year.

Provisions

Provisions are raised based on management's estimates from information available surrounding particular transactions. Prudence is exercised when estimating provisions so as not to materially overstate the Company's reported net income and understates its liabilities.

Useful lives of depreciable assets

Management reviews the useful lives of depreciable assets at each reporting date, based on the expected utilisation of the assets to the Company. The carrying amounts are analysed in note 5. Actual results, however, may vary due to technical obsolescence, particularly relating to computers and office equipment.

Useful lives of intangible assets

Management reviews the useful lives of intangible assets at each reporting date, based on the expected utility of the assets to the Company.

Right of use assets and lease liability

Right of use assets and lease liability have been recorded as per IFRS 16 "Leases". Management believes that the lease period used for calculation is based on facts and likely to conclude, as per contract. The interest rate estimation is also as per company's own borrowing portfolio and is market based. The carrying amounts of right-of-use asset analysed in note 5.

	100.00	100.00	4,283,675	4,283,675

12 Borrowings

Borrowings include the following financial liabilities:

Financial liabilities measured at amortised cost	2022	2021
	AZN	AZN
Subsidiary of the Parent Company	3,400,000	3,400,000
Governmental agency	1,084,637	709,376
Local banks	7,285,135	3,363,638
Total	11,769,772	7,473,014
Non-current portion	6,562,279	2,096,178
Current portion	5,207,493	5,376,836
Total	11,769,772	7,473,014

On October 31, 2017 the Company entered into a loan agreement with the Subsidiary of the Parent Company for a total amount of USD 2,000,000 at 3 month's LIBOR + 5.50% interest rate per annum plus the interest calculated will be grossed up for the applicable withholding tax applicable in the Republic of Azerbaijan to reach the total interest amount. The interest is paid on quarterly basis. The principal amount of loan was payable on November 7, 2019 which was extended till November 7, 2022 and in 2022 it was further extended till November 7, 2025.

On March 5, 2020 the Company entered into loan agreement with Agrarian Credit and Development Agency (ACDA) under the Ministry of Agriculture. Agrarian Credit and Development Agency (ACDA) is also known as AKIA. This agreement is to facilitate customers in agriculture activities. The customer provides 20% of asset's value as advance payment to the Company. The ACDA provides subsidy which is 40% of custom value, the benefit of this amount is passed on to the customer. The remaining amount is also given as loan to the Company by ACDA. The Company buys assets, and it is leased out to customers. The Company recovers this principal amount from customer and pays back to Agrarian Credit and Development Agency. Under this arrangement, the lessee is charged 7% interest rate per annum for the lease and the Company is liable to pay 2% interest per annum to AKIA, however, the interest to be paid by the lessee is ultimately borne by AKIA, therefore the net interest income of 5% per annum is recorded by the Company as it bears the default risk.

The Company entered into a credit line agreement with a local bank equivalent to AZN 2,000,000, accordingly an amount of AZN 1,627,033 is outstanding as at year end. The interest rate is 12.5% per annum. These loans will be repaid fully till November 2024. The lease assets equivalent to 150% of loan outstanding and future interest are pledged against these loans.

	2022	2021
	AZN	AZN
Income tax expense	<u>(192,798)</u>	<u>(157,943)</u>
Deferred tax income/(expense)	982	<u>(7,888)</u>
	<u>(191,816)</u>	<u>(165,831)</u>

Deferred tax

Deferred tax asset is measured at 20% (2021: 20%). The recoverability of deferred tax asset is dependent on future taxable profits. Deferred taxes reflect the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for tax purposes. The movement in deferred tax asset recognised by the Company is as follows:

	2022	2021
	AZN	AZN
Balance at January 1,	6,734	14,622
Charged during the year	982	<u>(7,888)</u>
Balance at December 31,	<u>7,716</u>	<u>6,734</u>

Total deductible temporary differences	38,582	33,668
Deferred tax asset at the statutory tax rate (20%)	7,716	6,734

19 Commitments, contingencies and operation risk

Lease commitments

The Company has no major outstanding lease commitments as at December 31, 2022 (2021: Nil).

Capital commitments

The Company has no major capital commitments as at December 31, 2022 (2021: Nil).

Contingent liabilities

Legal proceedings

From time to time and in the normal course of business, the Company receives claims against it. On the basis of its own estimates and internal professional advice the Company's management is of the opinion that no material losses will be incurred in respect of claims and, accordingly, no provision has been made in these financial statements.

The Company has filed two cases for the recovery of lease receivables and related amounts. However, the Company agreed with other parties for an out of court settlement. Therefore, the Company submitted an application to the court and asked for the claim to be returned without consideration. There is no case against the Company as at December 31, 2022.

Business environment and regulatory environment

The Company's main operations are conducted in the Azerbaijan Republic. Azerbaijan continues economic reforms and development of its legal, tax, and regulatory framework to strengthen and diversify the economy. In this respect, Azerbaijan endorsed strategic road maps for development of national economy and main economic sectors in 2016. Legislation including tax, currency fluctuation and customs legislations within the Azerbaijan Republic is changing rapidly.

The future economic direction of the Azerbaijan Republic is largely dependent upon the implementation of economic, financial, legislative and monetary measures undertaken by the government. The Company's financial position will continue to be affected by developments in Azerbaijan, however; the Company does not believe that these contingencies, as related to its operations, are any more significant than those of similar enterprises in the Azerbaijan Republic. The Company's management is closely watching these developments in current environment and taking appropriate necessary actions to support the sustainability and development of Company's business in foreseeable future. These financial statements do not include any adjustments that may result from the future clarification of these uncertainties. Such adjustments, if any, will be reported in the period when they become known and estimable.

19 Commitments, contingencies and operation risk (continued)

Business environment and regulatory environment (continued)

Commercial legislation of the Republic of Azerbaijan, including tax legislation, may allow more than one interpretations'. In addition, there is a risk of tax authorities making arbitrary judgments of business activities. If a treatment, based on management's judgment of the Company's business activities, was to be challenged by the tax authorities, the Company may be assessed for additional taxes, penalties and interest. Generally, taxpayers are subject to tax audits with respect to three calendar years preceding the year of the audit. However, completed audits do not exclude the possibility of subsequent additional tax audits performed by upper-level tax inspectorates reviewing the results of tax audits of their subordinate tax inspectorates. Management believes that its interpretation of the relevant legislation as at December 31, 2022 is appropriate and that the Company's tax, and currency positions will be sustained.

20 Financial instrument risk

Risk management objectives and policies

The Company is exposed to various risks in relation to financial instruments. The Company's financial assets and liabilities by category are summarised in note 8. The main types of risks are market risk, credit risk and liquidity risk. The Company's risk management is coordinated in close cooperation with the Company's directors and focuses on actively securing the Company's short to medium term cash flows by minimizing the potential adverse effects on the Company's performance through internal risk reports which analyse by degree and magnitude of risks. The Company does not actively engage in the trading of financial assets for speculative purposes nor does it write options. The most significant financial risks to which the Company is exposed are given below.

Market risk

Market risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices whether those changes are caused by factors specific to the individual security or its issuer or factors affecting all securities traded in the market. The Company is exposed to market risk through its use of financial instruments and specifically to currency risk and interest rate risk, which result from both its operating and investing activities.

Foreign currency risk

Foreign currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. Most of the Company's transactions are carried out in AZN. Exposures to currency exchange rates arise from the Company's overseas transactions, bank accounts and borrowings in foreign currencies, which are primarily denominated in US Dollar (USD).

Management of the Company does not enter future agreement to hedge its currency risk as USD to AZN is a stable conversion rate. However, these are monitored on regular basis and corrective measures initiated wherever required.

The following table illustrates the sensitivity of profit/ (loss) before tax and equity in regard to the exchange rate of the AZN relative to the USD. It assumes a 10% weakening/strengthening of the AZN as at December 31, 2022 (2021: weakening/strengthening 10%). The sensitivity analysis at each reporting date is as follows:

	Profit/(loss) before tax		Equity	
	2022	2021	2022	2021
	AZN	AZN	AZN	AZN
AZN weakening 10% / 10%	(344,856)	(342,666)	(275,885)	(274,133)
AZN strengthening 10% / 10%	344,856	342,666	275,885	274,133

Interest rate risk

Interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates.

Leases are generally granted at a rate of interest fixed for the duration of the lease and the majority of borrowings are at variable interest rates. Management of the Company does not enter future agreement to hedge its interest rate risk. However, these are monitored on regular basis and corrective measures initiated wherever required.

Borrowings on floating interest rates are as follows:

	2022	2021
	AZN	AZN
Borrowings	3,400,000	3,400,000

The following table illustrates the sensitivity of variable rate borrowings to a reasonably possible change in interest rates of $\pm 1\%$ (2021: $\pm 1\%$). These changes are considered to be reasonably possible based on observation of current market conditions. The calculations are based on a change in the average market interest rate for each period, and the financial instruments held at each reporting date that are sensitive to changes in interest rates. All other variables held constant.

	Profit/(loss) before tax		Equity	
	AZN	AZN	AZN	AZN
	+1%	-1%	+1%	-1%
2022	34,000	34,000	27,200	27,200

20 Financial instrument risk (continued)

Risk management objectives and policies (continued)

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company is exposed to this risk for various financial instruments, for example by granting credit terms to customers. The Company's maximum exposure to credit risk is limited to the carrying amount of financial assets recognised at the reporting date, as summarised below:

	2022	2021
Classes of financial assets - carrying amounts:	AZN	AZN
Net investment in finance lease (note 6)	17,393,776	12,416,565
Loan to a related party (note 7)	88,520	109,304
Other receivables (note 9)	650,563	471,771
Cash and cash equivalents (note 10)	180,996	178,093
Total carrying amount	18,313,855	13,175,733

The Company continuously monitors defaults of customers and other counterparties, identified either individually or by group and incorporates this information into its credit risk controls. Where available at reasonable cost, external credit ratings and/or reports on customers and other counterparties are obtained and used. The Company's policy is to deal only with creditworthy counterparties. To manage its risk exposure, the Company places its cash with reputable banks.

The Credit Policy of the Company, which was approved by the Management and Supervisory Board, sets forth principles and rules of financial leasing activity, as well as establishing main indicators of procedures with regard to the activity, mitigating the Company's risks, determining profitability and serving as guidance for all employees while they perform their duties.

There are certain limits set for the lease portfolio in order to ensure its diversification and minimization of possible credit risks. These limits are, as follows:

- Limits for business portfolio;
- Limits by sectors of economy; and
- Concentration limits

The limits are developed and revised by the management on an annual basis. In case of significant change in the market environment, the limits may also be reviewed. A proposal for limits change is provided firstly to the Credit Committee and next to the Management Board for approval and then it is approved by Supervisory Board. The Leasing Operations department controls maintenance of all limits on a regular basis and some of them (maximum exposure to a single borrower or group of related borrowers, maximum exposure to related parties) are controlled before new lease issue.

The Credit Policy of the Company regulates the authorities and responsibilities of each body of the Company involved in lending process and determine the limits for credit granting approval, the rules for monitoring of leases, and lending procedures etc. The Company's maximum exposure to credit risk is primarily reflected in the carrying amounts of financial assets on the statement of financial position. The Credit Committee of the Company ("CC") is the collective body which operates and reports to the Management Board. The overall role of CC is to control and manage all leasing operations approved in the framework of strategic and business plan of the Company. Credit Committee controls procedures and operations of leasing arrangements in accordance with the approved Credit Policy of the Company.

20 Financial instrument risk (continued)

Risk management objectives and policies (continued)

Credit risk (continued)

The Credit Committee is comprised of senior representatives from Finance, Risk Management and Economics and is responsible for reviewing and approving key inputs and assumptions used in our expected credit loss estimates. It also assesses the appropriateness of the overall allowance results to be included in the financial statements.

Liquidity risk

Liquidity risk also referred to as funding risk is the risk that an enterprise will encounter difficulty in raising funds to meet commitments associated with financial instruments. Liquidity risk may result from an inability to sell a financial asset quickly at close to its fair value. The Company maintains sufficient cash balances and monitors liquidity requirements on a regular basis and the management ensures that sufficient funds are available to meet any future commitments. The Company is also well supported by its related parties for the funding of long-term liquidity needs. Financial liabilities as disclosed in note 8 are non-interest bearing and have contractual maturity dates of less than twelve months from the reporting date except disclosed below:

	Interest rate	Within 1 year AZN	1 to 5 years AZN	Over 5 years AZN	Total AZN
December 31, 2022					
Subsidiary of the Parent Company	3 months Libor+5.5% per annum	-	3,400,000	-	3,400,000
Local banks	12%-12.5%	4,826,435	2,458,700	-	7,285,135
Local government entity	5% per annum	381,058	703,579	-	1,084,637
Lease liability	13% per annum	82,727	111,056	-	193,783
		<u>5,290,220</u>	<u>6,673,335</u>	<u>-</u>	<u>11,963,555</u>

	Interest rate	Within 1 year AZN	1 to 5 years AZN	Over 5 years AZN	Total AZN
December 31, 2021					
Subsidiary of the Parent Company	3 months Libor+5.5% per annum	3,400,000	-	-	3,400,000
Local banks	12.5%	1,747,328	1,616,310	-	3,363,638
Local government entity	5% per annum	229,510	479,866	-	709,376
Lease liability	13% per annum	72,693	193,783	-	266,476
		<u>5,449,531</u>	<u>2,289,959</u>	<u>-</u>	<u>7,739,490</u>

The above amounts reflect the contractual cash flows, which may differ to the carrying values of the liabilities at the reporting date. Balances due within one year equal their carrying balances as the impact of discounting is not significant.

Financial Statements

Notes to the financial statements (continued)

For the year ended December 31, 2022

21 Fair value and fair value hierarchy

Assets and liabilities measured at fair value in the statement of financial position are grouped into three levels of fair value hierarchy. This grouping is determined based on the lowest level of significant inputs used in fair value measurement, as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2: inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

All the financial assets and liabilities of the Company are carried at amortised cost and none of the non-financial assets and liabilities have been fair valued. Therefore, the fair value hierarchy disclosure which requires a three-level category of fair value is not disclosed because it does not have significant disclosure impact to the financial statements.

22 Capital management policies and procedures

The Company's capital management objectives are:

- to ensure the Company's ability to continue as a going concern; and
- to provide an adequate return to shareholders

by pricing products/services commensurately with the level of risk.

The Company monitors capital based on the carrying amount of equity less cash and cash equivalents as presented on the face of the statement of financial position. The Company sets the amount of capital in proportion to its overall financing structure.

The Company manages the capital structure and adjusts it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may adjust the amounts of dividends paid to shareholders and return capital to shareholders. As the Company has obtained NBCO license, the externally imposed capital requirement to be maintained is minimum AZN 300,000. Capital for the reporting periods is summarised as follows:

	2022	2021
	AZN	AZN
Total equity	5,904,665	5,179,313
Cash and cash equivalents (note 10)	<u>(180,996)</u>	<u>(178,093)</u>
Capital	<u>5,723,669</u>	<u>5,001,220</u>
Total equity	5,904,665	5,179,313
Borrowings (note 12)	11,769,772	7,473,014
Lease liability (note 13)	<u>193,783</u>	<u>266,476</u>
Overall financing	<u>17,868,220</u>	<u>12,918,803</u>
Capital-to-overall financing ratio	<u>32%</u>	<u>39%</u>
